

## EASY-Health: Enhancing Access to Services for Your Health

Project Title	EASY-Health: Enhancing Access to Services for Your Health
Project duration:	Willing to work out specific project details and duration based on student
Availability	Available from now until Dec 2022
Description:	People with intellectual and developmental disability experience numerous barriers to accessing hospital based healthcare. As a result, people with intellectual and developmental disability experience poor health outcomes and die earlier. This project aims to gain an in-depth understand the barriers people with intellectual and developmental disability experience using qualitative methods. Using a co-design approach we will develop of tools, resources and training aimed at improving the accessibility of the health system. We will implement the tools, resources and training and evaluate their effectiveness.
Expected outcomes and deliverables:	Qualitative analysis skills and experience working with people with disability. Able to tailor project to meet student's aims.
Suitable for:	Individuals wanting to improve health for marginalised population and develop qualitative research skills
Primary Supervisor:	Dr Katie Brooker
